

# Precision Meets Safety

Insights from our recent clinical study

Administering **Iron Sucrose IV Injection**  
through **Infusion Pump**  
to **150+ Healthy Participants.**

## Insights from our recent clinical study

Ensuring participant **safety and excellence** in administration of Iron Sucrose IV Injection via infusion pump.

- Recruited **150+ healthy male & female participants** based on **stringent enrollment criteria**, ensuring their eligibility and safety for trial participation.
- Leveraged **expertise** in handling **infusion pumps** & administering the IMP, which ensured safe and accurate delivery.
- Successfully overcame challenges in **complex IMP administration** procedure and **frequent post-dose sample processing**, preventing hemolysis & ensuring the availability of adequate and reliable samples for analysis.
